

Dundee Township Highway Staff

The Highway Department has Five (5) full-time positions (Mechanic, Foreman and (3) Operators) and one (1) full-time administrative assistant. Currently, all positions are full.

The total annual levy is determined by the Highway Commissioner and he/she presents an annual operating budget for final action to the Board of Trustees (which is comprised of the Township Supervisor and four (4) trustees). The Commissioner strives to keep the tax rates low.

The employees of the Highway Department and the Highway Commissioner all attend various classes throughout the year to upgrade their knowledge of highway management. All are certified with the State of Illinois. They have attended TOI (Township of Illinois) and Kane County training programs designed to improve public safety as well as courses from IDOT regarding snow plowing and "Flagging School".
